EDUCATION

University of Auckland <i>Bachelor of Engineering (Honours) in Computer Systems Engineering</i>	Auckland, New Zealand <i>Expected Graduation Nov 2027</i>
---	---

EXPERIENCES

Research Assistant <i>University of Auckland</i>	Auckland, New Zealand <i>Jul 2026 - Oct 2026</i>
--	--

- Conducted independent technical study of the **robot soccer system** at UoA's CARES lab, covering camera calibration, **vision processing** and decision strategy design, ahead of migration to a modern framework.
- Investigated **TurtleBot2** navigation algorithms, **LiDAR integration** and control using **ROS** and **Python** to build practical foundations in autonomous systems.

Robotics Instructor <i>Creative Imaginary Lab (ciLab)</i>	Auckland, New Zealand <i>Apr 2026 - Oct 2026</i>
---	--

- Instructed **50+ students** in robot **hardware assembly and software programming** to complete missions.
- Supported student development and coached teams in preparation for **nationwide robotics competitions**.

SKILLS

Programming Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, R, MATLAB, HTML/CSS
Tools & Frameworks: React, Tailwind CSS, Node.js, Express, JUnit, ROS, Android Studio, Figma, REST APIs, Spring Boot
Cloud & DevOps: AWS(Lambda, DynamoDB, S3, Bedrock, Kinesis), Docker, Terraform, Git, GitHub Actions

PROJECTS

Sentiment PULSE <i>Real-time Sentiment Dashboard - Individual Project</i>	Live Demo <i>Jun 2026</i>
---	--

- Built a serverless NLP pipeline with **AWS (Kinesis, Lambda, Comprehend, DynamoDB)** using AWS SAM, with idempotent writes, partial batch response retries, and a dead letter queue **to classify streaming text sentiment in real time** without data loss.
- Designed a **bounded DynamoDB GSI query pattern** instead of full table scans to keep read latency low, and batched Comprehend calls per Lambda invocation to cut API overhead.
- Developed a live React dashboard on AWS Amplify with **CI via GitHub Actions (21 frontend, 8 backend tests)** and a client side simulation fallback, applying cloud and AI/ML fundamentals **from certification study to a hands on project**.

RoastWorks Analytics <i>Business Analytics Dashboard - Team Project</i>	Python <i>May 2026</i>
---	----------------------------------

- Built a PyQt6 desktop analytics app with **pandas and Matplotlib**, automating a manual Excel workflow across **3 business units** and **52,000+ records**, cutting report time from a full day to **under 30 seconds**.
- Implemented three forecasting models across **36 months of data**, combining **scikit-learn** regression with a custom **NumPy** build of Holt's Exponential Smoothing, validated with MAE and RMSE.

AWARD

Top 8 Finalist in AWS×BNZ AI Hackathon 2026 <i>"Spottern!" - Statement Level Fraud Detection Platform</i>	Live Demo <i>Jul 2026</i>
---	--

- Built a serverless fraud pipeline with **AWS (SNS, Lambda, Textract, Bedrock, DynamoDB)**, using Claude Opus 4.8 on Bedrock **to extract and flag anomalies from bank statements** with cited transaction evidence.
- Proposed the approach to BNZ** by drawing on prior individual project experience with serverless AWS pipelines, placing **top 8 out of 20+ teams**.

CERTIFICATIONS

HashiCorp Certified: Terraform Associate · HashiCorp	<i>Sep 2026</i>
AWS Certified Solutions Architect - Associate · Amazon Web Services	<i>Aug 2026</i>
AWS Certified AI Practitioner · Amazon Web Services	<i>May 2026</i>
AWS Certified Cloud Practitioner · Amazon Web Services	<i>Apr 2026</i>

LEADERSHIP

Academic Team Executive <i>KEB (Korean Engineering Body) - Founding Member</i>	Auckland, New Zealand <i>Jul 2024 - Oct 2026</i>
--	--

- Co-founded** an engineering community of **170+ members**; contributed to a **17-member** executive team.
- Delivered **tutorial sessions** for junior engineering students and supported academic event planning.
