EDUCATION

University of Auckland

Bachelor of Engineering (Honours) in Computer Systems Engineering

Auckland, New Zealand

Expected Graduation Nov 2027

EXPERIENCES

Research Assistant

University of Auckland

Auckland, New Zealand

Jul 2026 - Present

- Contribute to the **robot soccer system** at UoA's robotics lab (CARES), including **control and decision making logic**, with future work migrating its classical architecture into a modern software framework.
- Develop and test navigation algorithms for **TurtleBot2**, with sensor integration and performance evaluation.

Robotics Instructor

Creative Imaginary Lab (ciLab)

Auckland, New Zealand

Apr 2026 - Present

- Instructed **50+ students** in robot **hardware assembly and software programming** to complete missions.
- Supported student development and coached teams in preparation for **nationwide robotics competitions**.

SKILLS

Programming Languages: Python, Java, C/C++, C#, JavaScript, TypeScript, SQL, R, MATLAB, HTML/CSS

Tools & Frameworks: React.js, Node.js, Express.js, JUnit, ROS, Git, Android Studio, Figma

Cloud & DevOps: AWS(Lambda, DynamoDB, S3, Bedrock, Kinesis), Docker, Terraform, GitHub Actions

PROJECTS

Sentiment PULSE

[Live Demo](#)

Real-time Sentiment Dashboard - Individual Project

Jun 2026

- Built a serverless NLP pipeline with **AWS (Kinesis, Lambda, Comprehend, DynamoDB)** using AWS SAM, with idempotent writes, partial batch response retries, and a dead letter queue **to classify streaming text sentiment in real time** without data loss.
- Designed a **bounded DynamoDB GSI query pattern** instead of full table scans to keep read latency low, and batched Comprehend calls per Lambda invocation to cut API overhead.
- Developed a live React dashboard on AWS Amplify with **CI via GitHub Actions (21 frontend, 8 backend tests)** and a client side simulation fallback, applying cloud and AI/ML fundamentals **from certification study to a hands on project**.

RoastWorks Analytics

Python

Business Analytics Dashboard - Team Project

May 2026

- Built a PyQt6 desktop analytics app with **pandas and Matplotlib**, automating a manual Excel workflow across **3 business units** and **52,000+ records**, cutting report time from a full day to **under 30 seconds**.
- Implemented three forecasting models across **36 months of data**, combining **scikit-learn** regression with a custom **NumPy** build of Holt's Exponential Smoothing, validated with MAE and RMSE.

AWARD

Top 8 Finalist in AWS×BNZ AI Hackathon 2026

[Live Demo](#)

"Spottern!" - Statement Level Fraud Detection Platform

Jul 2026

- Built a serverless fraud pipeline with **AWS (SNS, Lambda, Textract, Bedrock, DynamoDB)**, using Claude Opus 4.8 on Bedrock **to extract and flag anomalies from bank statements** with cited transaction evidence.
- Proposed the approach to BNZ** by drawing on prior individual project experience with serverless AWS pipelines, placing **top 8 out of 20+ teams**.

CERTIFICATIONS

HashiCorp Certified: Terraform Associate · HashiCorp

Sep 2026

AWS Certified Solutions Architect - Associate · Amazon Web Services

Aug 2026

AWS Certified AI Practitioner · Amazon Web Services

May 2026

AWS Certified Cloud Practitioner · Amazon Web Services

Apr 2026

LEADERSHIP

Academic Team Executive

Auckland, New Zealand

KEB (Korean Engineering Body) - Founding Member

Jul 2024 - Present

- Co-founded** an engineering community of **170+** members; contributed to a **17-member** executive team.
- Delivered **tutorial sessions** for junior engineering students and supported academic event planning.
